THIS IS HOW OUR STORIES BEGIN

E-PEOPLE empowering people

A **multinational corporation**, concrete people with a solid technical background. Our challenge: make them the protagonists of a much-needed and hoped for change.

A **group of managers** ready to everything but grown accustomed to everything: a project to revive the “sacred fire” of keenness towards people and organizations.

E-TEAM empowering real teams

A **team**, faced with an historic breakthrough but also with fears, contradictions, desires and worries.

The need for new instruments, a new language and identity.

An **European Board**: managers with different cultural backgrounds who were involved first-hand in founding their country... and who are now looking for a shared view and a strong alliance.

E-TRAINING empowering HR processes

An **heterogenous group** of highly experienced, well-trained, extremely professional, and yet disenchanted, HR colleagues. Used to manage people, they are now called to develop them.

Support **HR teams** in order for the implementation of new instruments within a company to be a chance to develop leadership skills and effectiveness
